Project Name	Smart Fashion Recommender Application
Team Members:	Jeeva M Ekamber L Lalith kumar M Madhan DS Vijaya kumar M

Step 1:

Go the official Docker website: <https://docs.docker.com/desktop/install/windows-install/>

The screenshot shows the Docker Docs website with the 'Install Docker Desktop on Windows' page. The page is titled 'Install Docker Desktop on Windows' and includes a 'Contents' sidebar on the right. The main content area has a 'Download Docker Desktop for Windows' button and a 'System requirements' section. The 'System requirements' section lists the following:

- WSL 2 backend
- Hyper-V backend and Windows containers

The 'WSL 2 backend' section further details the requirements:

- Windows 11 64-bit: Home or Pro version 21H2 or higher, or Enterprise or Education version 21H2 or higher.
- Windows 10 64-bit: Home or Pro 21H1 (build 19043) or higher, or Enterprise or Education 20H2 (build 19042) or higher.
- Enable the WSL 2 feature on Windows. For detailed instructions, refer to the Microsoft documentation.
- The following hardware requirements are required to successfully run WSL 2 on Windows 10 or Windows 11:

Step 2:

Click that button (Docker Desktop for Windows) and download will start and it takes few minutes to complete.

Step 3:

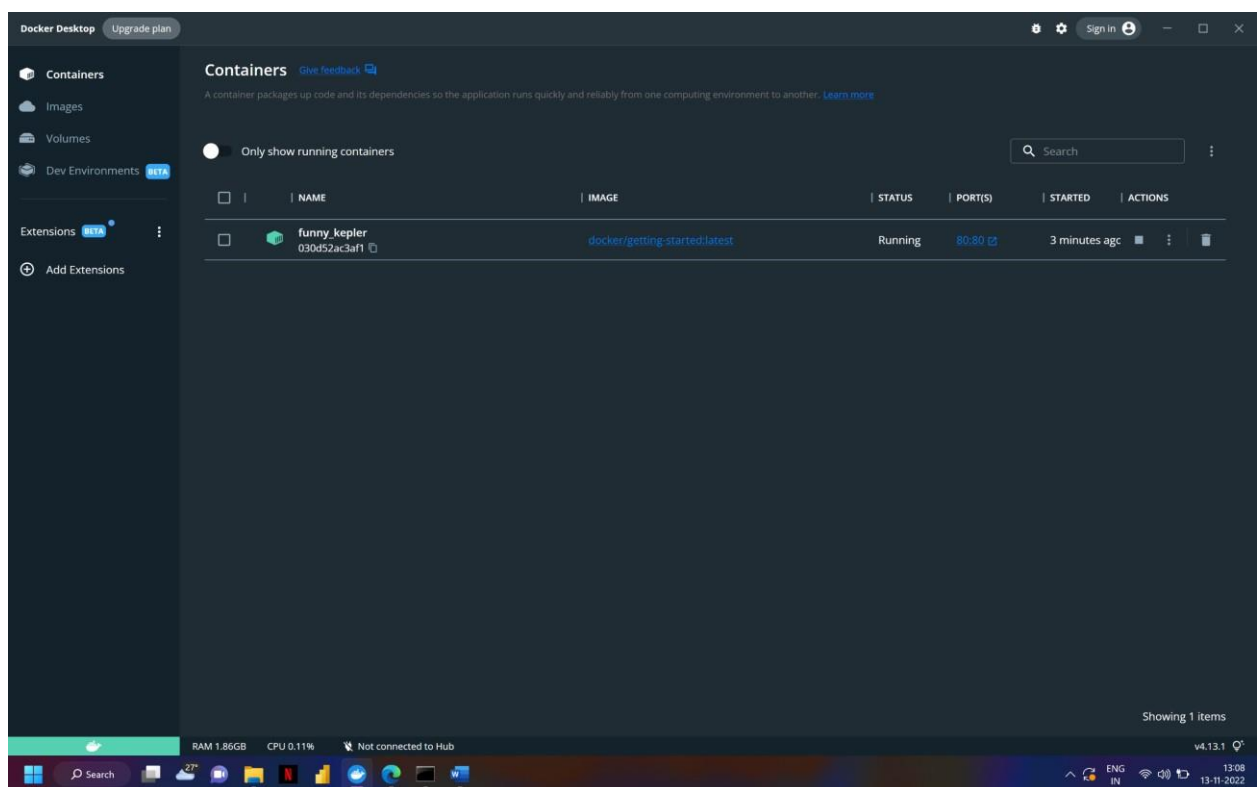

Go to downloads in browser (or) type **ctrl + J**, it will navigate to download page and double-click the particular docker file.

Step 4:

Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials. **Step**

5:

Docker will start correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.

Step 6:

Finally, the docker is installed successfully.
